UPDATE

U.S. ISS Radiation Instruments: Data Processing and Archiving

Michael Golightly

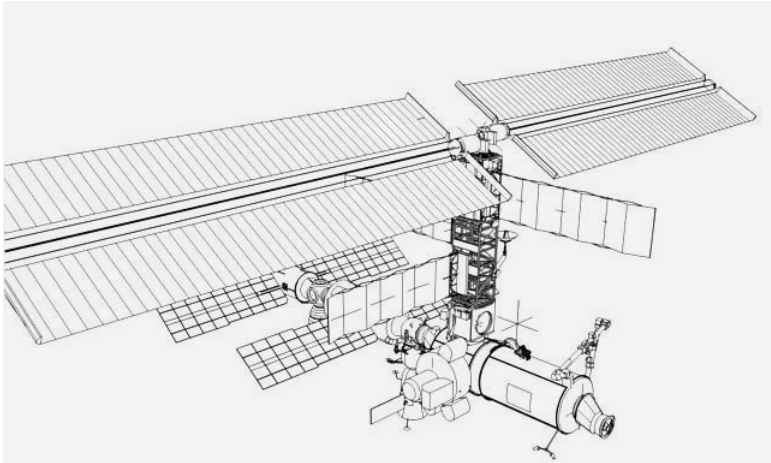
NASA Johnson Space Center

Claire Dardano, J. Garza, T. Shelfer, E. Semones, F. Riman, S. Johnson, J. Flanders, and N. Zapp

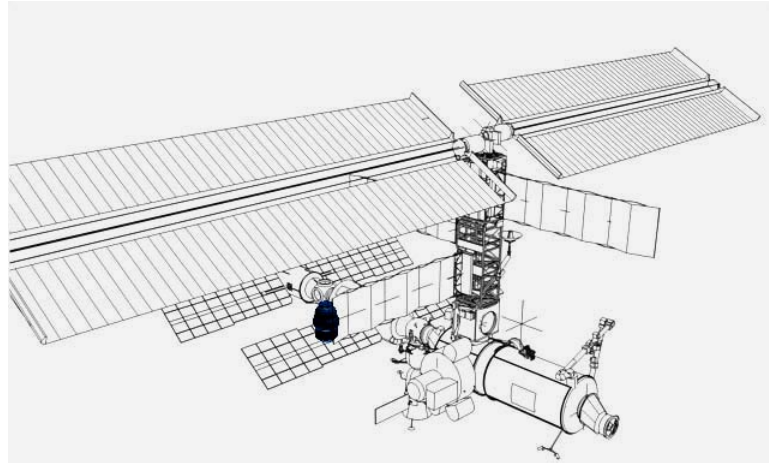
Lockheed-Martin, Houston

space radiation analysis group

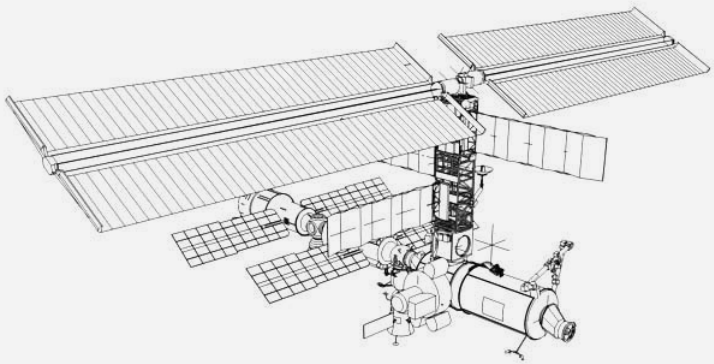
Since last we met, ISS continued to evolve . . .



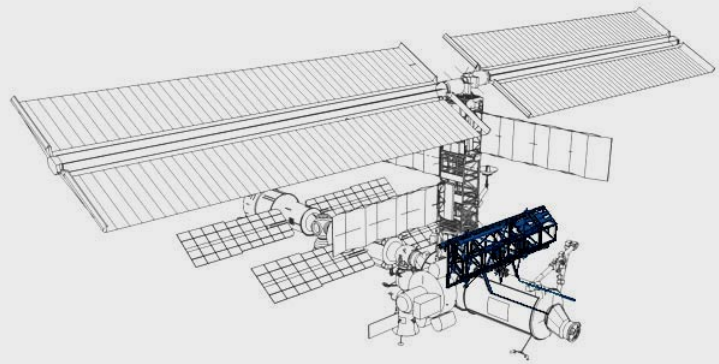
Aug 2001: STS-105, ISS crew swap



Sep 2001: added Russian Pirs docking module



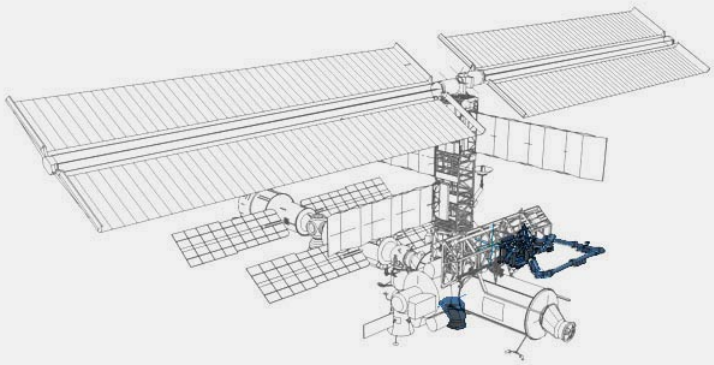
Dec 2001: STS-108, ISS crew swap



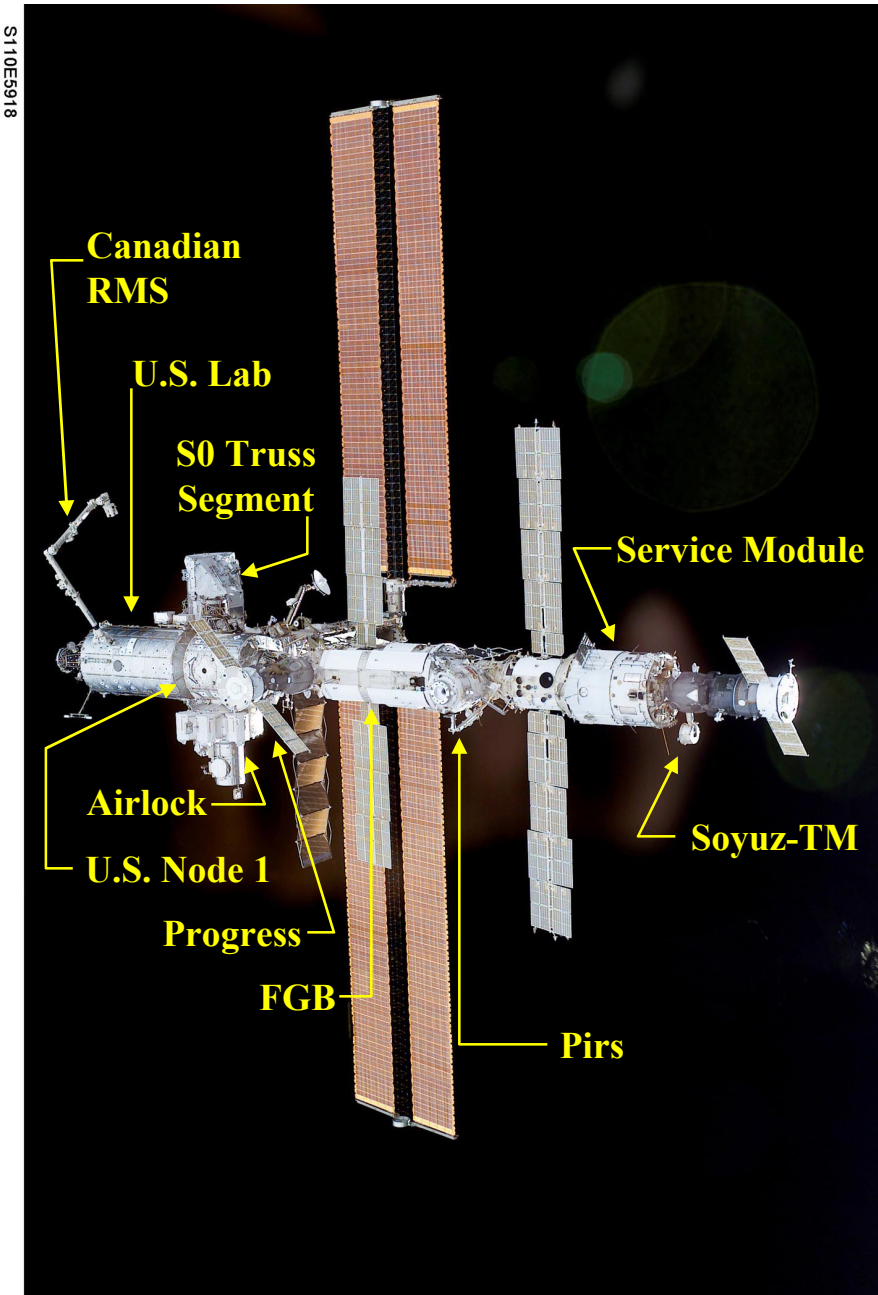
Apr 2002: STS-110, added S0 Truss segment, deployed EV-CPDS

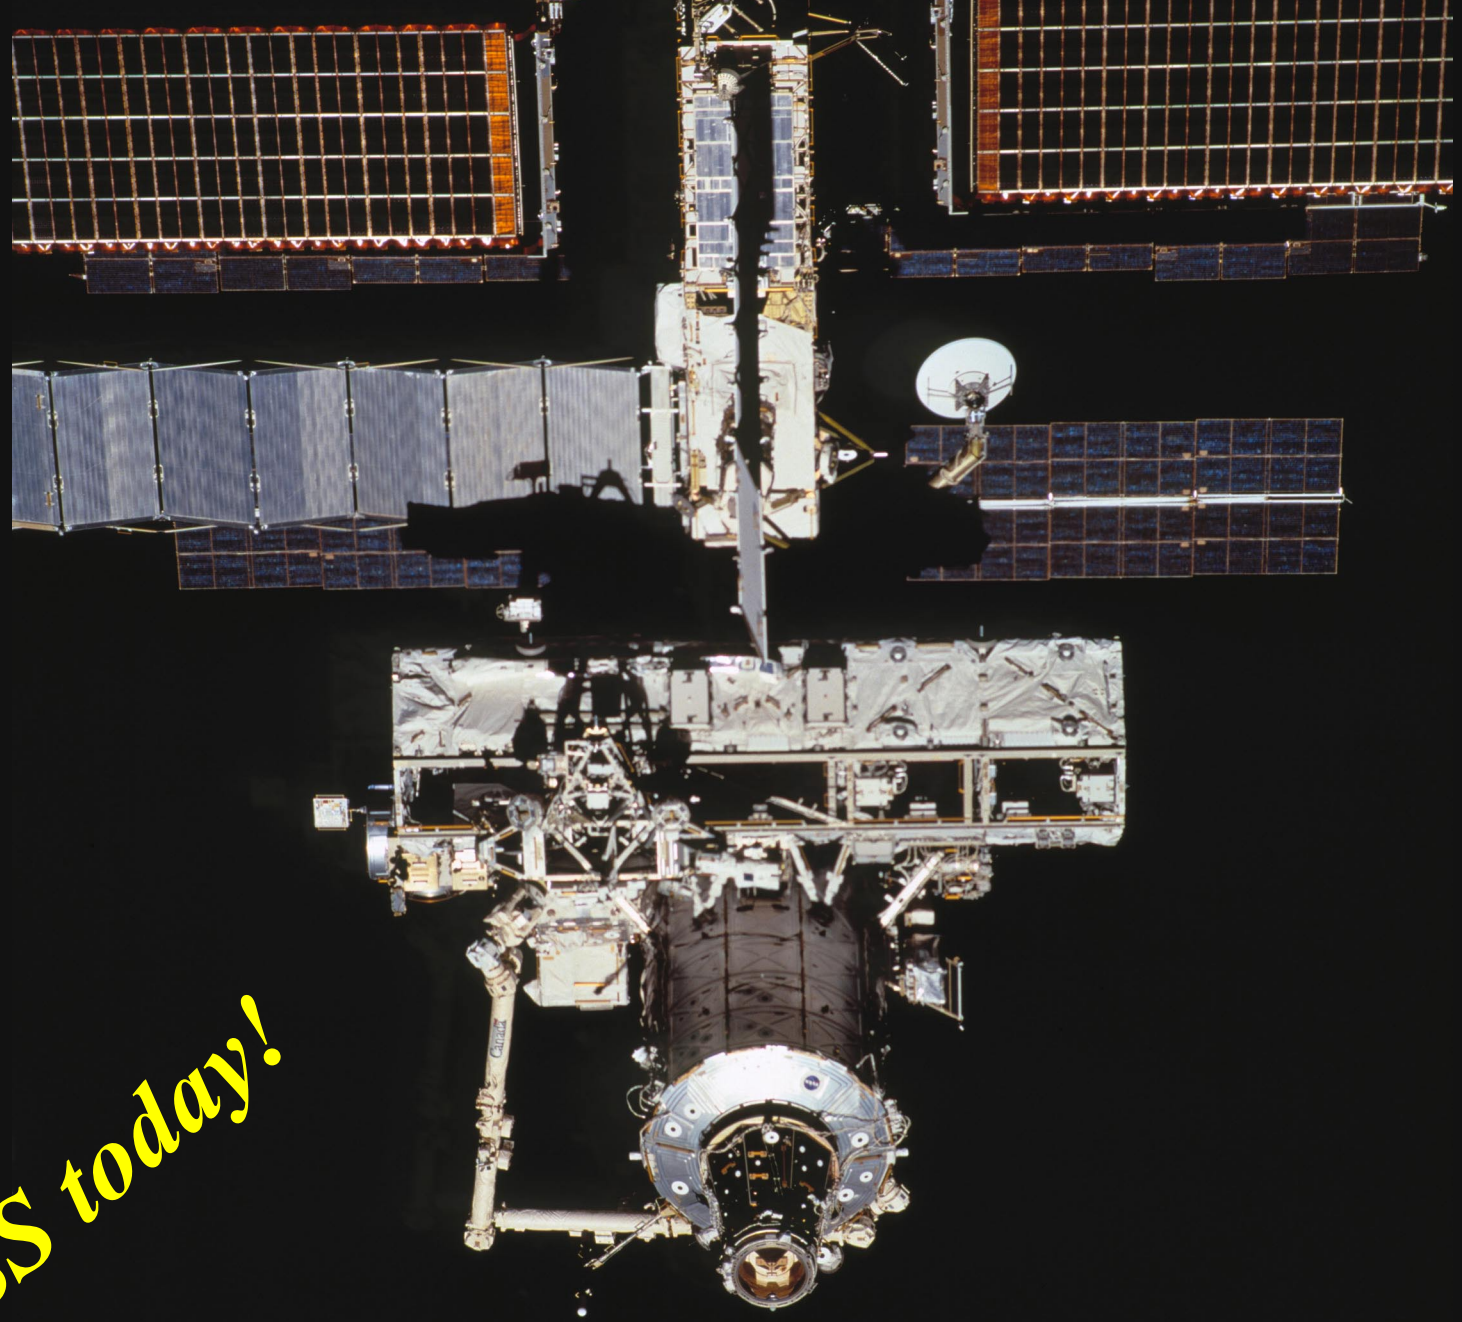
space radiation analysis group

Since last we met, ISS continued to evolve . . .



Jun 2002: STS-111, ISS crew swap, delivered RMS Mobile Base System





ISS today!

STS-111 15 Jun 2002

space radiation analysis group

Operational radiation monitoring system progress since WRMISS 2001

- Sep 2001: software upgrade uploaded into IV-CPDS
  * Allow adjusting detector bias voltage via ground commands
  * Etc
- Oct 2001: began capturing ISS TEPC cyclic telemetry and spacecraft state vector into database
  * Activation of TEPC real-time displays
- Nov 2001: began capturing IV-CPDS cyclic telemetry and spacecraft state vector into database
  * Activation of TEPC real-time displays
- Nov 2001: ISS TEPC and IV-CPDS evaluated with exposure to high-energy protons at Loma Linda cyclotron
- Feb 2002: Participate in ICCHIBAN 1
- Mar 2002: Upload software upgrade into ISS TEPC
  * Improve operational efficiency
  * Improve real-time estimate of dose equivalent

space radiation analysis group

Operational radiation monitoring system progress since WRMISS 2001

- Apr 2002: EV-CPDS launched and deployed
- Apr 2002: IV-CPDS detector bias voltages successfully adjusted by ground commanding
- May 2002: Participate in ICCHIBAN 2
- 28 May 2002: ISS TEPC high voltage supply failure
  - Instrument returned to ground on STS-111 (15 Jun 2002)
- Jul 2002: recommendation made by JSC Space and Life Sciences Directorate to manifest backup TEPC on next available Shuttle mission
- Jul 2002: EV-CPDS #3 telescope real-time display brought on-line
- Aug 2002: Investigation determined ISS TEPC failure isolated to single capacitor in high voltage supply

space radiation analysis group

Operational radiation monitoring system progress since WRMISS 2001

- Extensive investigation into instrument hardware anomalies
- Extensive investigation into instrument data file problems

space radiation analysis group

U.S. Space Radiation Monitoring System

Key

EV-CPDS: ***Extra-Vehicular Charged Particle Spectrometer***

IV-CPDS: ***Intra-Vehicular Charged Particle Spectrometer***

TEPC: ***Tissue Equivalent Proportional Counter***

RAM: ***Radiation Area Monitors*** **(TLDs)**

PRD: ***Passive Radiation Dosimeter*** **(TLDs)**

CPD: ***Crew Passive Dosimeter*** **(TLDs, PNTD)**

Active instrument real-time telemetry

Active instrument no real-time telemetry

Passive instrument

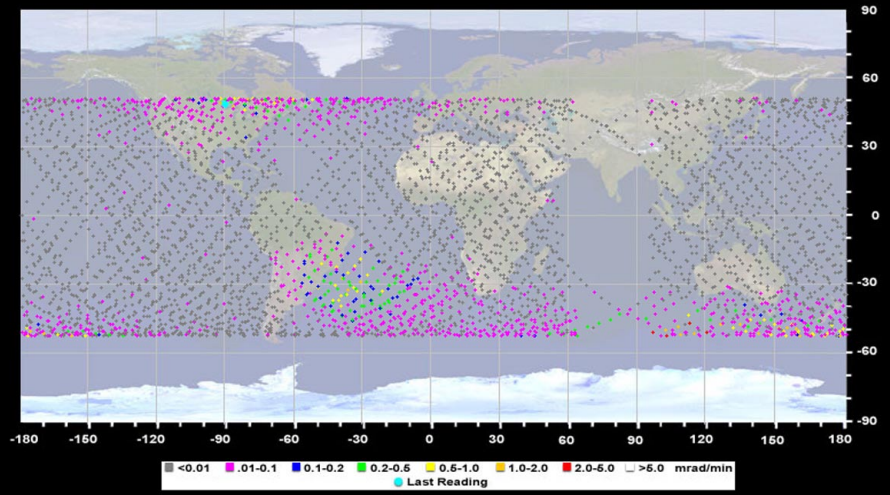
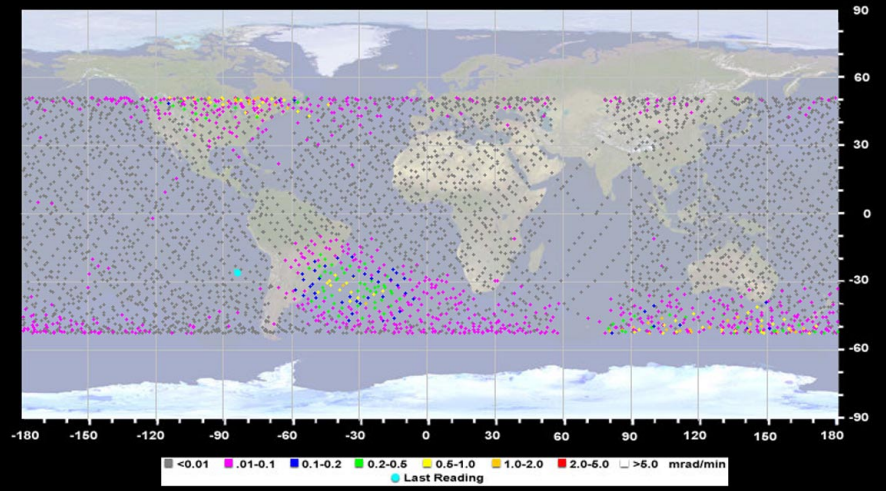
Recent SPEs Measured at ISS—TEPC Data

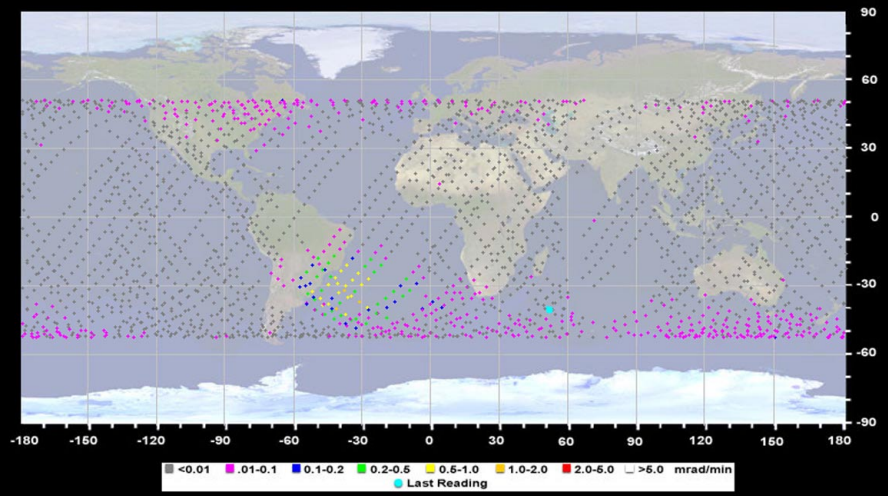
ISS TEPC Dose Rates: 11/04/2001 00:00:00 to 11/09/2001 23:59:59 (GMT)



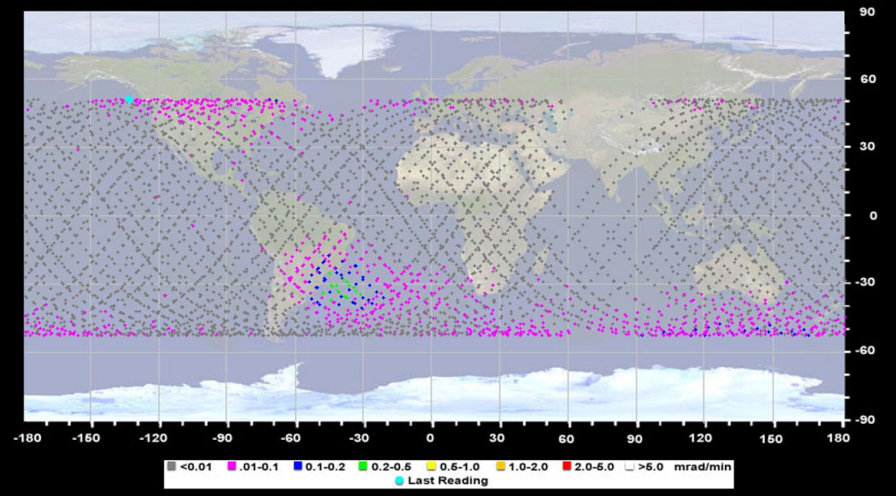
ISS TEPC Dose Rates: 11/22/2001 00:00:00 to 11/25/2001 23:59:59 (GMT)



ISS TEPC Dose Rates: 12/26/2001 00:00:00 to 12/28/2001 23:59:59 (GMT)

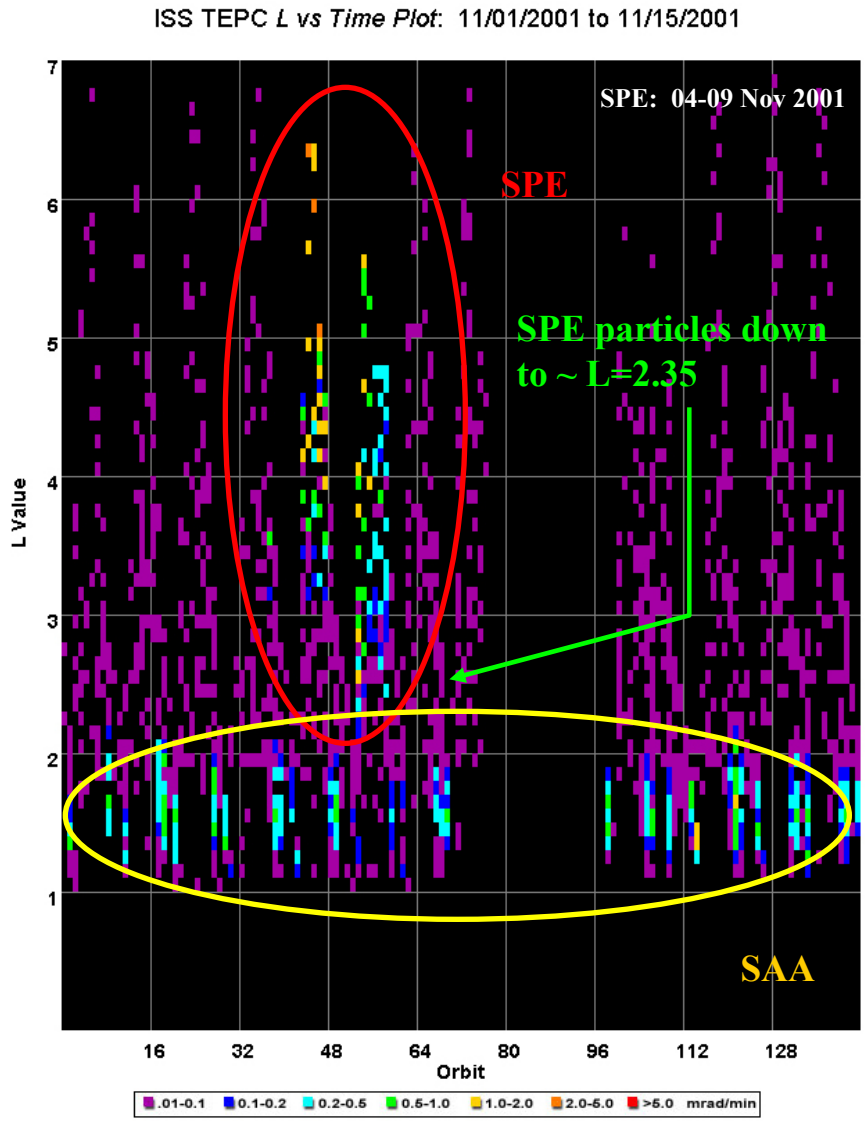


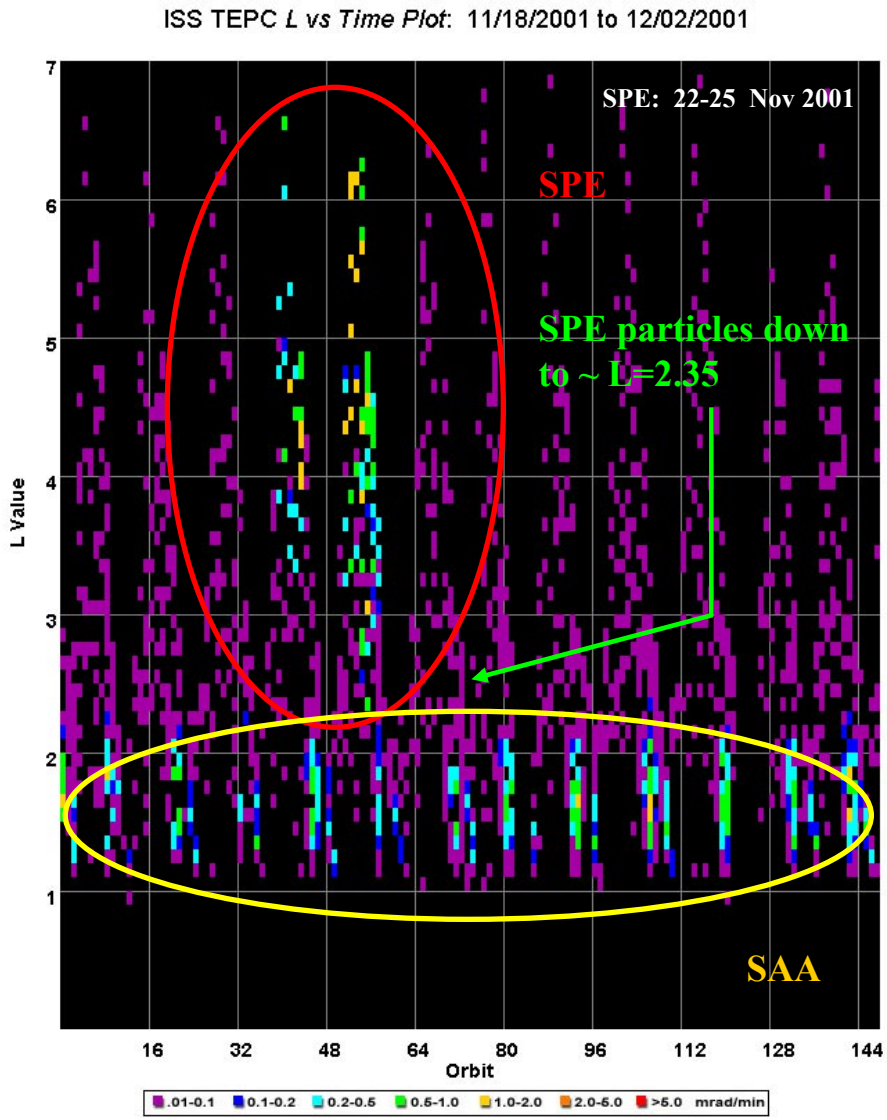
ISS TEPC Dose Rates: 04/21/2002 00:00:00 to 04/26/2002 23:59:59 (GMT)



space radiation analysis group

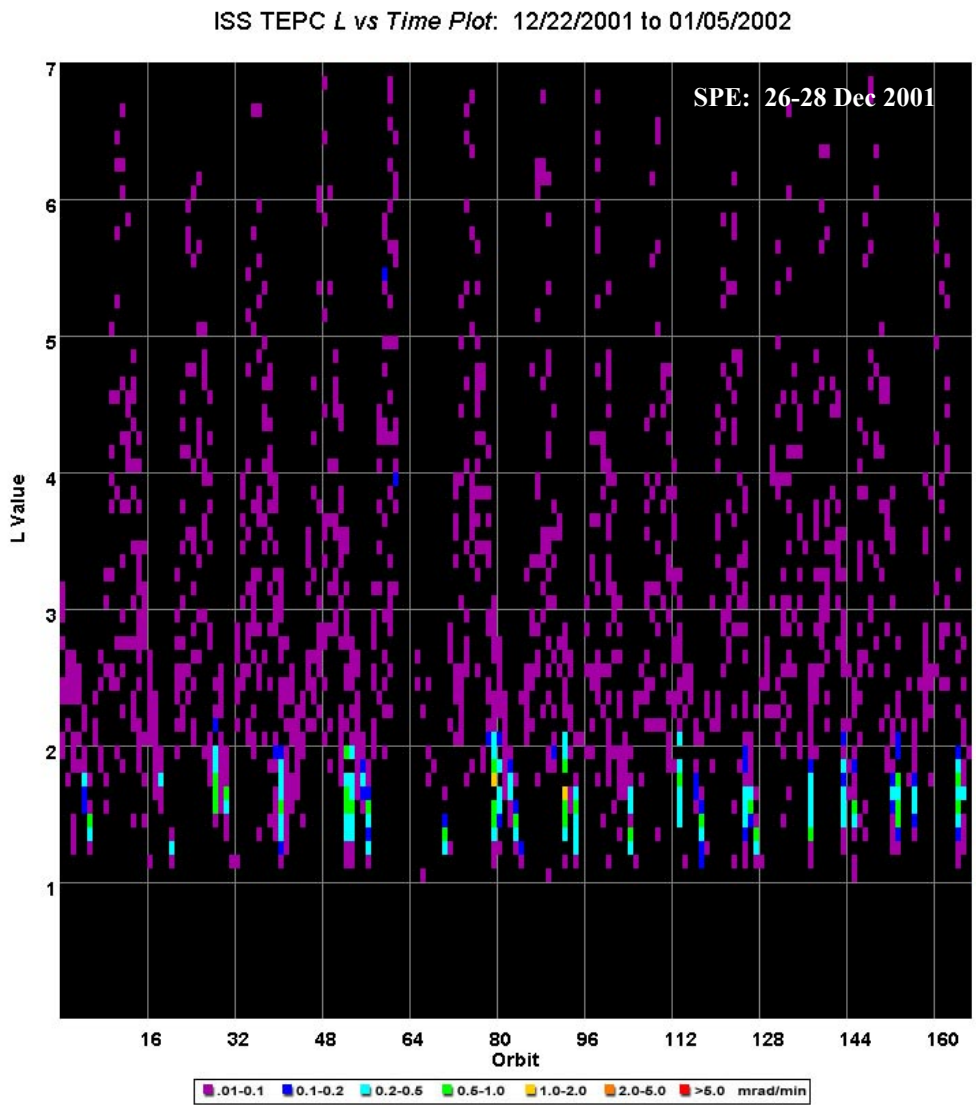
Recent SPEs Measured at ISS—TEPC Data

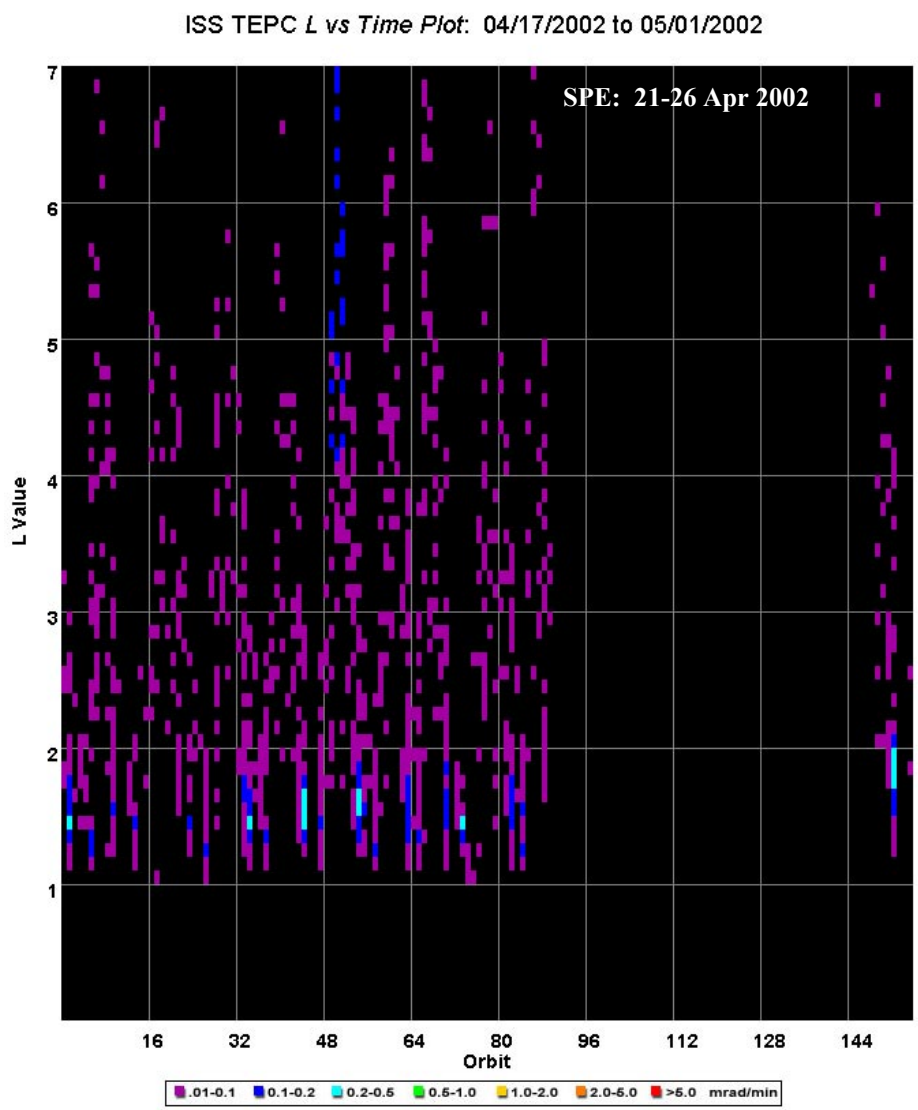


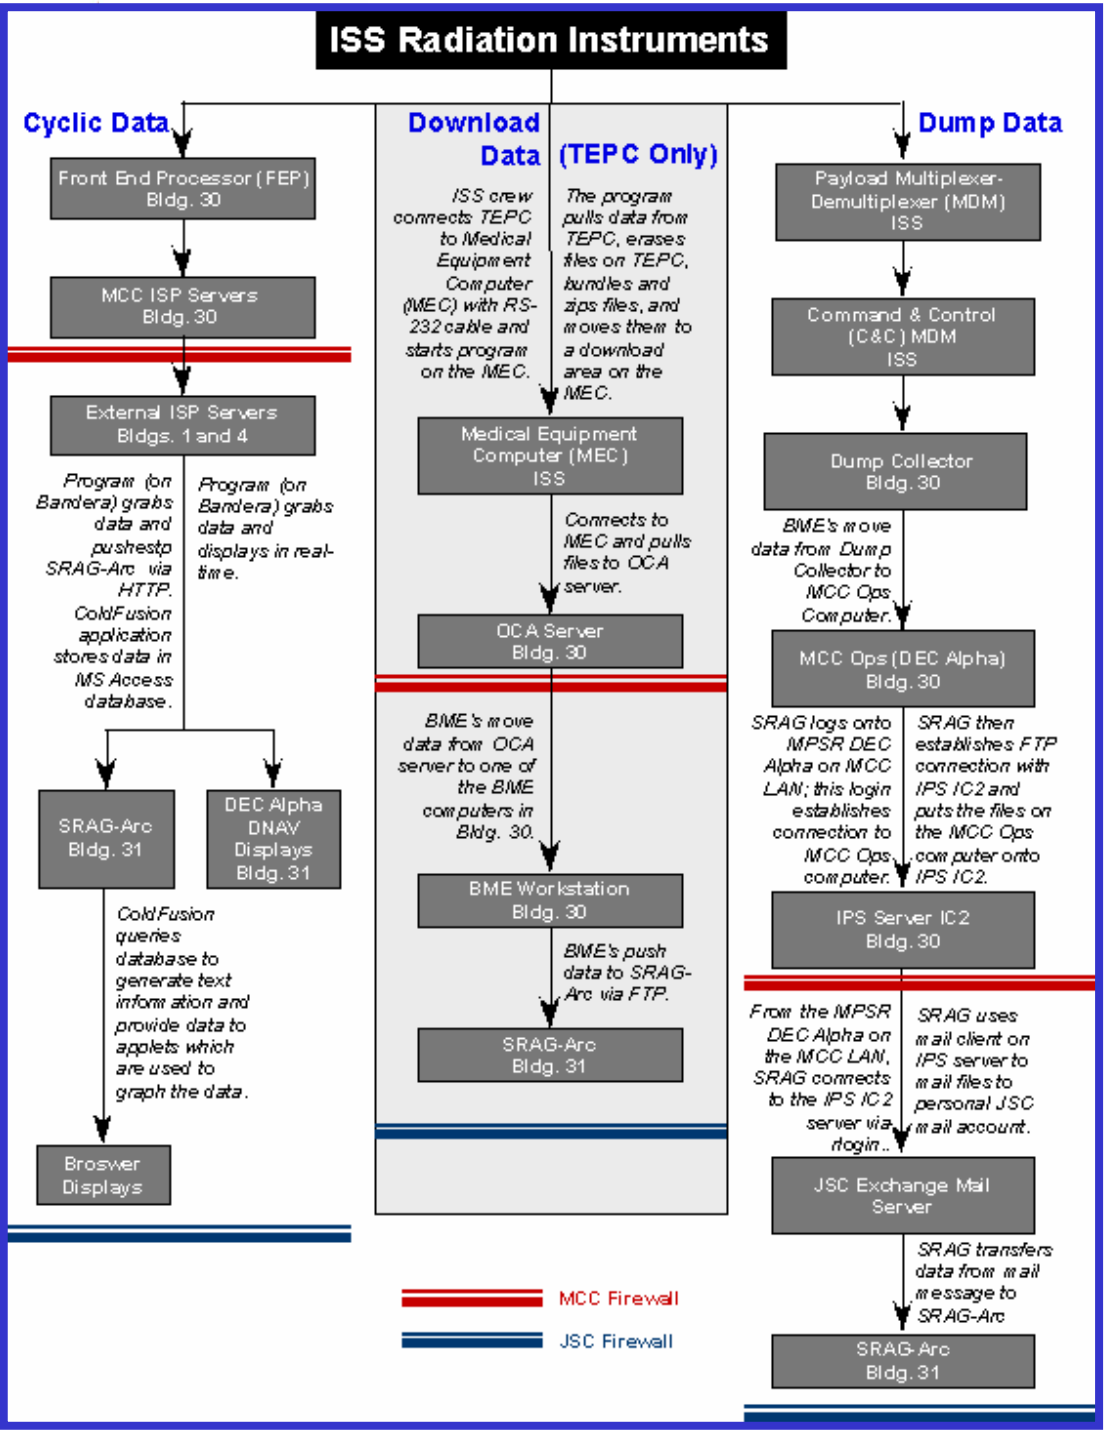


space radiation analysis group

Recent SPEs Measured at ISS—TEPC Data







- The data path from the ISS instruments to SRAG data servers is complex & inefficient
  - * Efforts underway to develop secure ftp capability to automatically move data from MCC-H to SRAG data server
    - Available ~ Jan 2003
- JSC network configuration prohibits access to U.S. radiation instrument data by computers on non-NASA networks
  - * Work in progress to establish U.S. radiation instrument data server outside of NASA's network security "firewall"
  - * New NT server procurement
    - Available NLT 30 Sep 2003
  - * Process to approve locating new server outside "firewall" underway
    - Approval date unknown

space radiation analysis group

Planned work for next year . . .

- Upload and install next IV-CPDS software upgrade (Sep/Oct 2002)
- Upgrade ISS radiation measurement data analysis/archive system (Sep-Dec 2002)
  - More robust NT server
  - Move data server outside “firewall”
  - Migrate database to MS SQL server
- Compute ISS as-flown ephemeris from Nov 1998 to present
- Backfill missing ISS TEPC and IV-CPDS cyclic data from NASA ODRC system
- Expand routine acquisition of space environment parameters
- Continue to troubleshoot instrument data file problems
  - “Scrambled” ISS TEPC data downloaded via 1553B
  - Data time-tag errors

space radiation analysis group

Planned work for next year . . .

- Make final adjustments to IV-CPDS and EV-CPDS instrument operating parameters (Sep-Dec 2002)
- Switch instrument data file download mechanism from 1553B/S-band to Ku-band
  * Much higher telemetry rates
  * Reduced telemetry time requirements
  * Reduced data loss due to insufficient telemetry availability
- Develop improved telemetry processing software
  * Increased automation
  * Increased automatic error checking
- Begin conversion of processed instrument data to CDF file format
- Participate in ICCHIBAN 3 & 4 dosimeter intercomparisons
